

## Tips for Career Expos

1. Target students most likely to benefit from deeper understanding of careers in the sector being represented at the expo.
2. Lead up to the event by bringing in a career speaker on that pathway.
3. Help your students develop a list of questions to ask exhibitors.
4. Following the event, have students report on what they saw, learned about, etc.
5. Talk about next steps. If a student was interested in the radiology exhibit, what can they do to learn more about the career? Suggest research, a tour, job shadow, etc. Use the Career Cruising Network and work with your Talent Link staff representative to provide guidance.
